

This educational video is the first of a series to promote the “cycle” in recycle and environmental stewardship.

Applicable to many grade levels, the subject matter pertains to both science and social studies curriculums.

*(Students) “enjoy the action and understand the dialogue”*

*Pat Rieszal - Gr. 4 Teacher*

*“...very creative and successfully depicts the importance of ‘closing the loop’”*

*Licia Paddison - Waste Reduction Specialist*

*“...will allow children to see the results of their recycling efforts...illustrate the role children play in protecting and preserving the environment.”*

*Bill Smith - Mayor of Edmonton*

# "My Life as a Plastic Bottle"

...what a natural gas would say about how it became a product!

*"I was born when the dinosaurs died and started rotting away underground"*

This educational video is the first of a series to promote the cycle in recycle and environmental stewardship.

We follow the journey of ethane gas, a natural resource, in the 1st person, demystifying its path through extraction, construction into a product, first and post-consumer uses.

*"...We get to Live On!"*

**Running Time: 25 minutes**
